

Mina Thompson

Backend Web Developer

Phone No: +234 810 281 2909

Email: thompsonmina7@gmail.com

GitHub: [www.github.com/Thompsonmina](https://github.com/Thompsonmina)

Location: Lagos, Nigeria

Website: <https://thompsonmina.github.io/>

SKILLS

Technical

- **Backend:** Python, Flask, Django.
- **Frontend:** HTML5, CSS3, VanillaJS, Bootstrap.
- **Databases:** PostgreSQL, MongoDB, SQLite.
- **CI/CD:** TravisCI, GitHub Actions
- **Version Control:** Git, GitHub.

Soft Skills

- Solid communication skills.
- Problem solving.
- Eagerness to learn.
- Able to work with minimal supervision.

PROJECTS

- **Flack**

A web application built using Python with Flask on the backend, Bootstrap and VanillaJS on the frontend and MongoDB as a database. It is a chat application that makes use of the websocket protocol to enable real time communication between users. You can create public channels to chat with the community as well as chat one on one in private channels. It is deployed on Heroku and you can be found live at <https://thompson-flack.herokuapp.com/>.

- **Bleeps**

A social web application built using Python with Django for the backend, Bootstrap and VanillaJS on the frontend and PostgreSQL for the database. Users sign up and can start sharing their thoughts(bleeps) and viewing other people's bleeps, Every user has access to their own personal profile and they can follow and get followed by other users. It is deployed on Heroku and can be found live at <http://bleeps.herokuapp.com>.
